

## Product Technical Data Sheet

## *Blockout UV Ikonos*

### General description

Blockout UV is a coated firm combination of PP+PET+PP intentionally laminated with black adhesive in order to block the light from both sides. It was designed to be used with any type of UV printer. It can be printed on both sides.

### Application

Any kind of indoor and outdoor application, especially roll-ups, pop-ups, stands, expo applications, POS graphics, shop-window graphics, pictures, posters, displays and any other application which requires blocking the light from both sides.
